

# Spill kit

## User manual

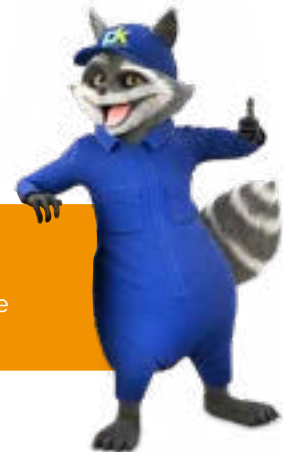

- 1 Notify others in the vicinity about the spill.
- 2 Wear the necessary protective equipment.
- 3 Use absorbents to prevent the spill from spreading.
- 4 Apply absorbent materials to the spill.
- 5 Properly dispose of used materials.
- 6 Restock the spill kit if necessary.

**!** *Contact safety representatives or local environmental offices if you need help or advice.*

### Tip!

Enhance your knowledge and preparedness. Organize an annual spill preparedness exercise and learn everything you need to know about safe spill management in your operations.
